The PSS-G2 media console is a man-machine interface which allows call-paging, messages broadcasting and DSP matrix parameter control of the IDA8. Its back-lit touch screen is designed for simple and user-friendly operating. The 3-hardware-keys can be freely assigned within the System control software. Various operating levels with password protection make the PSS-G2 Media console a versatile device that fits well in a commercial shopping center as for an industrial environment where paging requires flexibility and easy access. All paging parameters needed for site operating can be programmed: zones assigned to the different buttons, name of zones, group of zones, messages triggering, levels adjustments and pre-call chime but also for fader control, button control or event control. The message and the chime are stored into the PSS-G2 media console.

A total of 168 keys over 12 pages allow zone or group of zones selections. Each key contains a green color changing field indicating that the zone is occupied by a different process.

### PSS-G2 Characteristics
- 5” TFT full color paging console
- 3 LED indicators: Power/General Fault/Evacuation active
- 3 key-buttons: User definable using ATEÏS Studio GUI
- 168 Touch fields: 14 pages with 12 keys
- Console size: \((L \times W \times D) 9.84 \times 5.51 \times 3.15\) in.
- Microphone flex length: 11.02 in.
- Weight: 2.42 lbs.
- Color: RAL 7016
- Front tilted at 30°
- Material: metal back, PVC top and sides
